PROFILE

I am a fullstack engineer fluent in React all the way down to REST APIs and SQL. Equipped to work diligently and thoughtfully anywhere in the stack, I am passionate about continual learning and mentoring others. I work collaboratively and cross functionally to design, test, and deploy production features across applications, thoughtfully using AI tools to enhance my development. Known for owning complex features end-to-end and improving system performance, I prioritize continual learning and understanding the why behind the work.

LANGUAGES & TECHNOLOGIES

- React, Typescript, Javascript, HTML, CSS
- C#, Python, Java
- .NET, Node.js, SQL Server, REST APIs, Logical Modeling
- Git, GitHub, Gitlab
- Jenkins, Splunk, XUnit, Jest, Control-M
- Kafka, data pipelines

EDUCATION

Wellesley College – Wellesley, MA | May 2023

B.A. in Computer Science & Minor in Philosophy, Summa Cum Laude, GPA: 3.90

Massachusetts Institute of Technology – Cambridge, MA | Cross-registered Student | 2020

EXPERIENCE

Citizen Shipper | Fullstack Engineering Contractor, Remote (CA)

Mar 2026 - Present

Online marketplace for shippers and transporters

- Design, implement, test, and deploy features across Next.js, Node.js, and SQL applications with cloud infrastructure.

McMaster-Carr | Systems Engineer II, Chicago, IL

Jun 2023 - Jan 2026

Industrial supplier and content publisher for print and web publications

- Designed and delivered full-stack features across a service-oriented ecosystem of 10+ independently deployed applications, ensuring reliability through unit testing and post-deployment monitoring.
- Partnered with product and cross-functional teams to scope features, clarify requirements, and deliver data-intensive UI workflows balancing system complexity with business need.
- Owned architecture, implementation, and cutover of a resilient data pipeline syncing millions of records daily from DB2 to SQL Server, enabling reliable access to critical data across the organization.
- Disambiguated performance needs in a shared React NPM package and decreased render times by up to 85% across consuming applications.
- Led a team of 7 engineers through a 3-month fullstack training program; led application architecture, data model, and feature scoping, while directing daily development work.
- Partook in 24/7 on-call rotations to support ongoing and legacy systems.

Grand Avenue Software | Software Developer, Saint Paul, MN

Feb 2021 - Aug 2022

Quality management system for regulated medical device manufacturers

- Built proof of concept data visualizations in PowerBI using DAX, PowerQuery, and consuming RESTful endpoints to demonstrate the feasibility and value of this technology for all customers.
- Consistently designed, debugged, and delivered new features within an agile, test-driven development environment using .NET and Powershell.

SavingFace at MIT Media Lab | Project Manager, Cambridge, MA

May 2020 - Dec 2020

ML mobile app for detecting face-touching behavior at the beginning of COVID-19

- Led a team of 3 in user experiments evaluating an ML application detecting face-touching behavior.
- Published a peer-reviewed article about the efficacy and approach to this technology.

eLumen Inc. | Software Intern, Minneapolis, MN

Summers 2018 & 2019, Jan 2020

Startup for a curriculum and assessment software that promotes holistic evaluation in higher education

- Developed features for a client-facing web application with microservices architecture using Angular, Node.js, HTML, and CSS while adhering to standard UX/UI guidelines.
- Collaborated with a multi-national team to meet the needs of 100+ US colleges within agile sprint cycles.

LEADERSHIP & EXTRACURRICULARS

Sommelier II – Certified Sommelier | Kendall College | 2025

2022 NCAA DIII National Champion - Varsity Crew | Wellesley College | 2019-2022

Orientation Mentor - Volunteer | Wellesley College | 2020-2023

B2 DELF French Language Certification – Certified Fluency in French | 2019
